

IIChE National Committee 3I

Industry Institute Interaction Committee 2018

Industrial Training program for Fresh Graduate Chemical Engineers

Industrial training program is an initiative taken by IIChE based on industrial survey from "small scale to multi-national companies" regarding their expectation from young fresher chemical engineers for acceptability in industry, after which we concluded with this program and able to convince some industries to accept fresher pass out as trainees. However, RCF Mumbai has some fees for such industrial training, but we are on a positive note with other companies to provide free training to IIChE student members and if possible some stipend. **We are collecting CV of interested students** for this IIChE program, which will be circulated in IIChE associated companies and then interviews will be conducted by the companies to enroll.

The tenure of training is likely to be 3-6-9 months (solely depends on company), after which a report is to be submitted by the candidate and a certificate will be issued by IIChE to the candidate. In case if candidate leaves the training before completion, candidate will be black listed at IIChE.

Who can go for industrial training program?

- 1) After completion of graduation in chemical engineering, every student should opt for such industrial exposure programs, to get a practical touch and become a true Chemical Engineer.***
- 2) Graduate students interested to go for higher studies will have a gem in their profile.***
- 3) Graduate & Post Graduate students interested to have their future in industry.***
- 4) Graduate & Post Graduate students interested to go for Academia should compulsorily go for such exposure. It will help them to educate and guide their students on professional and industrial needs.***

Further once you are associated to IIChE, you shall have opportunities to participate and be a part of various industry and academia activities.

The student will have to send his/her CV and get associated to IIChE by becoming a Life member to avail benefits of this program, details are available on IIChE website and the membership form is available as well, for existing student members, there are some discounts.

For any more queries etc. you may call or write us
